Amendments to the Specification

Please replace paragraph beginning on page 7, line 22 and ending on page 7, line 30 with the following paragraph:

In an embodiment of the present invention, at least one capture device 12 includes a barcode reader. In an embodiment of the present invention, at least one capture device 12 is a wireless device to enable operator mobility. The capture device 12 is capable of capturing remote data. The remote data may include customer data. The remote data may include patron data. The remote data may include security rounds data. The remote data may include parking data. In an embodiment of the present invention, the remote information is patron personal and preference data. In an embodiment of the present invention, the remote capture devices 12 include wireless LAN and/or WAN-enabled units that can communicate with the central database 14 in real time over the Internet. This eliminates the need to dock the unit in a cradle to dump the data to the central database 14.
